

Tiche 60 Plus
Tiche 60SI Plus

3 autoclaves into 1

B class tabletop steam sterilizer for medical and dental professionals

Tiche 60^{Plus} & Tiche 60SI^{Plus} at a glance:

- **60 liters** chamber
- Up to **12 kg of sterile material in just 59 minutes**
- **Automatic**, hands-free **door release**
- Direct **feeding of tap water** thanks to built-in reverse osmosis
- Extended product lifetime thanks to the **water quality sensor**
- **7 sterilization cycles**, money saving for every needs
- USB **datalogger** and thermal **printer**
- Available with/without **cabinet**
- 1 cycle instead of 3 with a smaller sterilizer, **half water and power consumption**
- 1 autoclave instead of 3 smaller ones, **lower the costs of maintenance**

Mr. Jeremy Onyett

BVSc Cert SAS, MRCVS, RCVS Advanced Practitioner in Small Animal Surgery at Abington Park Referrals, UK and user of our 60 L

Ms. Rebecca Hollingshead

RVN Head Veterinary Nurse at Abington Park Referrals, UK and user of our 60 L

How many patients are treated and how many surgeries performed per day?

We run 5 to 6 advanced orthopedic surgeries per day, 8 to 10 lumpectomies and several dental procedures.

How many times do you use our 60 L per day?

The 60L autoclave runs on average 8 to 9 times a day. We sterilize all our orthopaedic equipment, drills, plating systems and surgical instruments.

Why did you choose our 60 L?

We needed to purchase the 60 L autoclave to fit all our orthopedic equipment, orthopedic drills, joint replacement, thins, plates, screws. We were recommended to purchase the 60 L autoclave, and it has been fantastic in continuing to deliver good service.

Mgr. Erika Vranková

Head of Nurse at Andel Elite Dental Center, Slovakia and user of our 60 L

How many patients are treated per day?

120 to 150 patients visit us during a normal day.

How many surgeries does the practice perform per day?

Surgical procedures are run only 3 days a week with 8 to 10 surgeries per each day.

How many times do you use our 60 L per day?

We perform 2 cycles during the 8-hours work shift, while 3 cycles during the 12-hours shift.

Why did you choose our 60 L?

We were using our existing 23 L sterilizer too often. We wanted to reduce the number of cycles per day. The 60 L also allows us to sterilize bulky surgical cassettes thanks to its larger chamber.

Dr. Angelo Della Bona

Orthodontist at Dental DB, Italy and user of our 60 L

Ms. Martina Bertolassi

A.S.O. at Dental DB, Italy and user of our 60 L

How many patients are treated per day?

Due to COVID-19, to protect our clients, we reduced to 40% the number of visits. We are now welcoming 20 patients per day.

How many surgeries does the practice perform per day?

Excluding the quick check-ups, we do 5 to 6 surgeries.

How many times do you use our 60 L per day?

We perform 1 cycle at the end of the day and for urgent tools we use a smaller sterilizer.

Why did you choose our 60 L?

We were looking for a money saving solution. With the 60 L autoclave, we can perform 1 cycle instead of 3 with a smaller sterilizer. Yet, we have a lower power consumption.

QuickClean (QC1, QC3 & QC6)

Ultrasonic Cleaner

The QuickClean comes in **three** table top **sizes**. Each unit has a single, customizable cycle from 1 to 99 min and cleans throughout the entire bath using Frequency-Leap technology that ensures all of your instruments are **fully cleaned, no matter where they are placed in the basket**. The intelligent software remembers the last cycle settings and the **fluid sensor ensures** the bath always has **sufficient water levels**.

	Capacity	External dimensions Tank size	Weight	Supply voltage Power consumption
QC1	4.5 L	W 345 x D 260 x H 265 mm W 300 x D 150 x H 150 mm	6 kg	220-240 V 50-60 Hz 100 W
QC2	12.5 L	W 375 x D 420 x H 265 mm W 330 x D 300 x H 150 mm	8.5 kg	220-240 V 50-60 Hz 200 W
QC3	25 L	W 550 x D 420 x H 365 mm W 505 x D 300 x H 200 mm	13.5 kg	220-240 V 50-60 Hz 400 W

QuickSeal

Sealing Machine

QuickSeal is safe thanks to **acoustic signals and LEDs** that **alert the staff** when the sealing is complete. It is equipped with **automatic switch off to avoid damage** due to **heat overexposure**. The reel holder can be placed on the workbench or hung on the wall.

Sealing band dimensions	External dimensions	Weight	Supply voltage Power consumption
H 12 x W 300 mm	W 400 x D 370 x H 440 mm	7.5 kg	220-240 V 50-60 Hz 100 W

ABOUT US

Based in Italy, **Newmed – A Midmark Company** manufactures tabletop sterilizers for medical, dental, veterinary and beauty industry. Since 2010, Newmed is part of **Midmark Corporation**, an American manufacturer of medical devices and diagnostic software.

Our water steam sterilizers are compliant with:

93/42/CEE	Medical Device Directive (MDD)
2014/68/EU	Pressure Equipment Directive
2012/19/EU	Waste electrical and electronic equipment (WEEE)
EN 13060	Small steam sterilizers
CEI EN 61010-1	Safety prescriptions for electrical, measuring, control and laboratory equipment
CEI EN 61010-2-040	Safety requirements for electrical equipment for measurement, control, and laboratory use - Part 2-040: Particular requirements for sterilizers and washer disinfectors used to treat medical materials
CEI EN 61326-1	Electrical equipment for measurement, control and laboratory use - Prescriptions of electromagnetic compatibility

The specifications of this catalog may change without notice.
