PBR 2500L Algae Bioreactor

Five easy steps to reliable, biosecure live algae

Order & Install

Your algae equipment ships directly from our facility. Uncrate and set up in less than 4 hours.

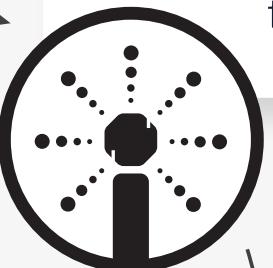

Harvest

The PBR automatically harvests continuously for months, or the entire batch can be harvested at any time.

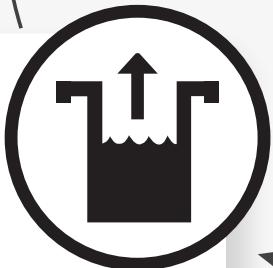

Clean

Run the clean-in-place (CIP) system to clean the reactor before inoculation.

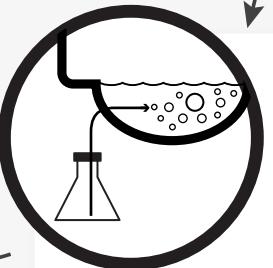

Scale up

Add nutrients and water automatically, while temperature and pH are constantly regulated to optimize growth.

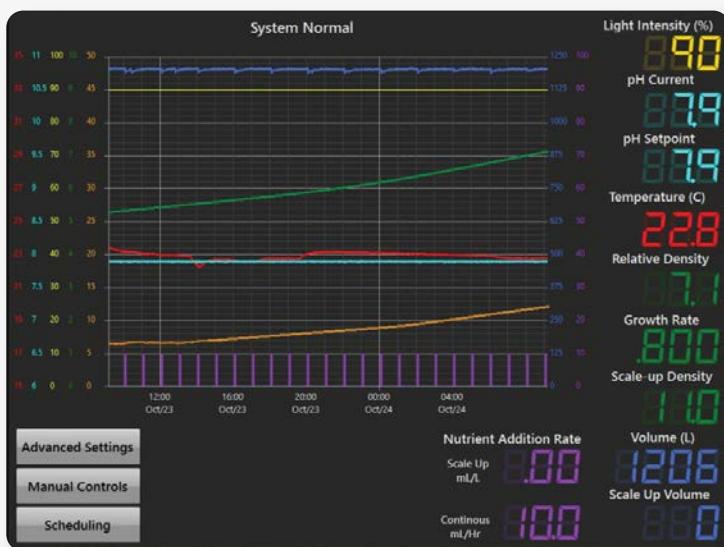

Inoculate

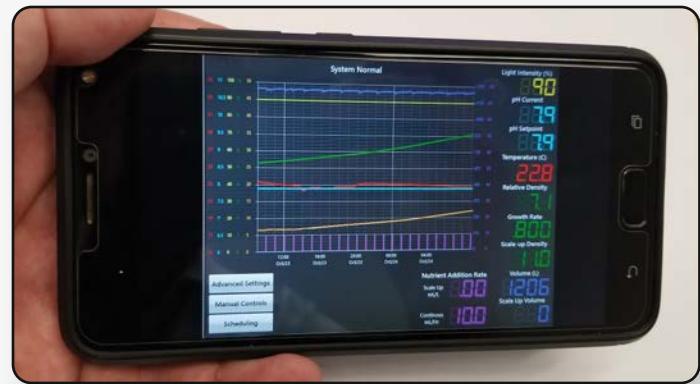

Inoculate with a small volume of clean algae using biosecure disconnects.

INDUSTRIAL PLANKTON™

Real Time Data Logging

Web-Based Remote Access

Continuous Production

400-1000 L harvested/day

By Species (10^6 cells/mL)

- 25 • *Thalassiosira pseudonana*
- 20 • *Isochrysis* sp.
- 115 • *Nannochloropsis* sp.
- 3.8 • *Tetraselmis* sp.
- 23 • *Chaetoceros muelleri*

By Weight (Ash Free Dry Weight)

- 300-600 g produced/day
- 0.6 g/L density

Batch densities typically 2-3X
that of continuous

More algae that thrive

- *Thalassiosira weissflogii* • *Pavlova* sp.
- *Karenia brevis* • *Skeletonema* sp.
- *Chaetoceros gracilis* • *C. calcitrans*
- *Haematococcus pluvialis* • *Spirulina* sp.
- *Chlamydomonas* sp. • *Chlorella* sp.

Production may vary based on quality of strain & inoculum
